

Svitlana Shnur

Junior Test Engineer

About Me

I'm a Junior QA Engineer, I finished the course and realized that I want to develop further in this business, because in this profession there are no limits to unleash your potential and continuous development. Testing is a very important business that allows you to produce a quality product that will satisfy both the customer and the user. My goal is to become a professional tester who ensures high quality products.

Languages

- Ukrainian - Native
- English - Pre-Intermediate (A2)

Education

QA Manual courses at the international online university of modern professions GetEd
March 2023 - June 2023
[Certificate of completion of courses](#)

Hard Skills

- Basic testing theory (types of testing, test design techniques)
- Understanding the role of a tester in a team (interaction with developers, analysts)
- Classification of testing types (functional, regression, integration, system)
- Creation and optimization of test documentation (checklists, test cases, test suite, bug reports)
- Hands-on experience with TestRail, including creating and managing test suites
- Understanding of STLC, SDLC, QA processes and methodologies
- Understanding of agile methodologies (Scrum, Kanban) and participation in sprints/task boards
- User interface (UI) testing using Figma, Perfect Pixel, Photoshop
- Testing with DevTools (DOM analysis, JavaScript errors, network requests)
- API testing (Postman, Swagger)
- Database testing (queries to one and several tables)
- Analyzing databases and relationships between tables using dbdiagram.io
- Basic understanding of HTML, CSS, SQL, XML, JSON
- Version control with Git and GitHub

Soft Skills

- Communication: Ability to speak clearly and explain tasks
Organization: Ability to plan time effectively and prioritize tasks
- Teamwork: Ability to work in a team and collaborate with other departments
 - Learning skills: Quick learning of new technologies and tools
 - Analysis and problem solving: Ability to analyze situations and find optimal solutions

Experience

May 2014 - up to now: Head of a pawnshop branch

My duties:

1. Organization of the work process:

- Writing job descriptions and training documentation
- Organizing workplaces and managing work schedules
- Correction of mistakes made by employees
- Carrying out inventory activities

2. Controlling the work of employees:

- Ensuring the implementation of job descriptions
- Quality control of the performance of duties by employees

3. Financial and production reporting:

- Maintaining financial reports and analytical documents
- Preparation of production reports

4. Staff training:

- Training of new employees and advanced training of existing employees

5. Cooperation with management departments:

- Coordination with other departments to ensure the effective work of employees
- Communicating with management and other departments to resolve organizational and operational issues
